

20 good reasons to get in the PINK®.

- Improve comfort in summer by reducing heat GAIN via walls and ceilings
- Improve comfort in winter by reducing heat LOSS via walls and ceilings
- Improve comfort by reducing noise transfer through ceilings and walls
- Reduce the need for artificial heating and cooling
- Reduce the operating times and settings of heaters and air conditioners when they are used
- Allows heaters and air conditioners to operate more efficiently, making them more reliable and extending their life
- Safe due to superior fire performance – non combustible
- Safe to use with down-lights (when installed as per manufacturer's instructions)
- Safe due to bonded fibres that do not move around in the attic space or enter the house
- Safe to use with allergy sufferers due to low VOC content
- Easy to cut and install by DIY
- Performs equally well in summer & winter conditions
- Will not settle – thereby providing optimum performance for the life of the home
- Guaranteed to perform to AS/NZS 4859.1
- A sustainable product being made from approximately 70% recycled glass and saving up to 400 times the energy that goes into making them
- Australian made and proud of it
- Save on energy bills
- Save on greenhouse gas emissions
- Save the environment
- Good Environmental Choice Australia certified product

Comfort

- Increase comfort levels
 - Thermal
 - Acoustic

Save

- Save on energy bills
- Pays for itself in as little as 3-4 years

Health

- Provide a healthier household environment

Efficient

- Lower energy consumption

Environmental

- Reduce greenhouse gas emissions

PINK BATTS® Comfort for Keeps.

Insulation plays a vital role in increasing comfort to your home by stabilising internal temperatures and reducing noise transmission. Importantly, insulation also helps reduce energy costs for heating and cooling which is good for the family budget and environment.

Pink Batts® insulation produces environmentally sustainable products that improve the energy efficiency of our homes.

Using less energy in the home helps reduce greenhouse gas emissions. *Pink Batts®* are made from up to approximately 70% recycled glass and save hundreds of times more energy than is used to produce them.

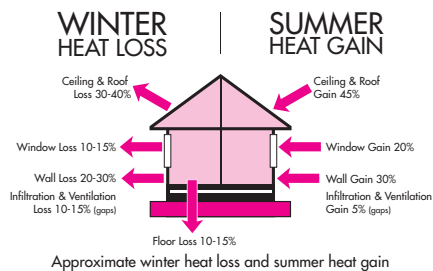

By installing *Pink Batts®* insulation you not only increase your home's comfort levels, you are also helping to sustain the world for future generations to enjoy.

Get in the Pink®.

By installing *Pink Batts®* insulation you reduce heat transfer by up to 60% and that means great savings on your energy bills, not to mention how comfortable you'll be.

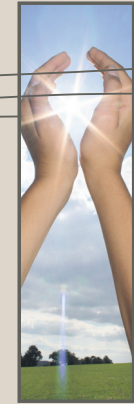

Pink Batts® can actually reduce summer heat in your home by up to 8°C - 12°C.

Pink Batts® are non-combustible, so there's no increased fire risk and can be used with confidence around down-lights when installed as per manufacturer's recommendations.

The thermal performance of an insulation batt is determined by its R-Value.

This is an internationally accepted measure of its ability to resist the flow of heat. The higher the R-Value, the more effective the insulation.

Trusted by Australians for over 50 years

Since 1956 *Pink Batts®* have been Australia's favourite insulation. *Pink Batts®* has undergone improvements and changes over that time to increase its efficiency in temperature control giving Australians even more comfort.

Pink Batts® are safe to use and their bonded fibres and low allergen status makes them ideal for allergy sufferers.

FII - 2007
GECA 33-2007 - Building Insulation
www.geca.org.au

Fletcher Insulation™ is Australia's first insulation company to be awarded GECA certification for its Insulation & Building Blankets range of products. This independent accreditation system recognizes the development and manufacturing of products that have proven environmental performance and is recognised worldwide through its affiliations. The GECA accreditation benefits consumers in knowing that their choice of Fletcher Insulation's product range for their insulation requirements will help reduce greenhouse gas emissions and reduce the impact on the environment during the product's entire life cycle.

NOMINAL R-VALUES	APPLICATION
R1.5 Wall Batts	The standard batt designed for insulating walls.
R2.0 Wall Batts	Extra performance for harsher climates.
R2.5 High Density Wall Batts	Used to meet 5 star requirements with a 90mm product.
R3.0 Ceiling Batts	Extra wall insulation performance with acoustic properties.
R3.5 Ceiling Batts	The batt for mild climates.
R4.0 Ceiling Batts	Ideal for meeting 5 star requirements in more severe climates.
R5.0 Ceiling Batts	The best option for BCA Climate zones 7 & 8.
R6.0 Ceiling Batts	High performance batts for extreme conditions. Used to meet 6 star standards and above.
